

### Call for papers

Special issue of the journal *Computational Statistics* on Functional Data Analysis and Related Topics

Ricardo Cao (Co-Editor), Germán Aneiros (Guest Editor), and Philippe Vieu (Guest Editor)

In today's information age, there is an urgent need to develop stochastic models and statistical inference tools for the analysis of abundant and complex data. This special issue will be dedicated to new Computational Statistical developments in Functional Data Analysis and innovative contributions to related fields, including Complex Data, High-Dimensional Statistics, Machine Learning, and Statistical Inference for Big Data.

This special issue is intended to include some of the best computational statistical papers presented at the International Workshop on Functional and Operatorial Statistics (IWFOS 2017) to be held in A Coruña, Spain, June 15–17, 2017 (<http://iwfos2017.udc.es/>). However, other innovative contributions to the field are welcome. All papers will be refereed and subject to the same high-quality standards as regular submissions to the journal *Computational Statistics* (see <https://www.springer.com/statistics/journal/180>).

Submissions will be possible within the time frame: May 1st - October 31st 2017. Those authors interested in submitting an article for possible publication in this special issue, please visit the webpage: <http://www.editorialmanager.com/cost/>
