For many years, Springer has been playing an active role in the scientific publishing in China. With SpringerLink, access to China's most important research work becomes easy. With the growing significance of the research output from China, it will become one of the most important sources of research information for the scientific communities worldwide. Springer publishes a collection of scientific journals from Chinese research institutions, learned societies, universities as well as academies under the name of Chinese Library of Science.

By the introduction of the Chinese Library of Science to researchers and libraries globally, Springer unlocks the door to Chinese scientific work that was once not easily available to the international scientific communities.

In addition to universities, societies, institutions, and academies in China, Springer has also strategic cooperation and co-publishing agreements with top scientific publishers from China.

Our key publishing partners include

- Science Press
- Higher Education Press
- Tsinghua University Press
- Zhejiang University Press

For many years, Springer has been playing an active role in the scientific publishing in China.

The Chinese Library of Science is the bridge of China's scientific research to the world.

Yang Wei, President of Zhejiang University, Academician of Chinese Academy of Sciences

We look forward to collaborating with Springer so that we may concentrate fully on our primary mission. We are also pleased to partner with this respected publishing house, which has a long tradition of excellent relations with China.

Science Press

Science Press is one of the most prestigious academic publishers in China, and the official publishing arm of the Chinese Academy of Sciences. For more than half a century, Science Press has taken on the mission to present the world with the finest achievements of Chinese scientists in the fields of natural science research.

- With Science Press, Springer co-publishes the Science China Series and the Chinese Science Bulletin, two of the most important multi-disciplinary academic publications in China
- Supported by Chinese Academy of Sciences and National Natural Science Foundation of China
- Science Press celebrates the 60th anniversary of its journals Chinese Science Bulletin and the Science China Series in 2010

Higher Education Press

Higher Education Press, the largest and most prominent publisher of educational books in China, was founded in 1954. It is the official publishing arm of Ministry of Education of China.

- Springer co-publishes the Frontiers in China Series, consisting of a total of 24 journals
- Covering scientific papers from different academic fields in the Higher Education sector in China

Tsinghua University Press (TUP)

Founded in 1980, Tsinghua University Press, as part of Tsinghua University, is one of the most prestigious academic publishers in China. It has been named as the “National Excellent Publisher” and “Distinguished University Press” by their quality publishing service to academicians.

- New Journals are launched to meet the demand for emerging and hot subject areas
- New titles to be included in the Chinese Library of Science comprising Building Simulation and Nano Research, a journal fully adopting the Open Access business model

Zhejiang University Press (ZJUP)

ZJUP takes advantages of the teaching and research sources of Zhejiang University, one of the top 3 universities in China. Publishing in disciplines like Technology, Medicine, Humanities and Social Sciences.

- Managed and edited by an international board of distinguished scientists from all over the world

From the reviews

- “…It is wise to bring the fruits of Chinese scientific research to the English reading world.”
- Springer LAB member
