Territorial Integrity in a Globalizing World
International Law and States’ Quest for Survival

This book offers a comprehensive, highly informative and interdisciplinary study on territorial integrity and the challenges of globalization, self-determination and external interventions. This study aims at not only to fill an epistemological gap in this regard, but also answer the question of whether International Law is adequately equipped to help states address these challenges. The author argues that the biggest threat that many states are confronted with today is their disintegration rather than their obsolescence, and that International Law has not often been able to prevent that eventuality. In fact, states, when they were not destroyed by war, managed to survive, thanks to the flexibility of territoriality, i.e. their ability to adjust to difficult situations as they arose.

Insurance Systems in Times of Climate Change
Insurance of Buildings Against Natural Hazards

Natural disasters such as large-scale flooding are on the increase. Climate change directly affects our basis of existence. This includes residential buildings, and commercial and industrial properties. The author highlights the requirements that will have to be met by a protection system for buildings in the future. Insurance against natural hazards lies at the heart of such a system. The insurance systems of Germany, France, Spain, Switzerland and the USA are presented. The author explains what type of insurance system is best suited to meet the challenge of climate change. The starting point of the legal section is statutory insurance with a monopoly. The question of whether such insurance is compatible with Swiss and EU law is examined.

Contents
Challenge: Climate Change as the Starting Situation.- Global Climate Change.- Climate Change in Switzerland.- Consequences for Insurance Against Natural Hazards.- Insurance Systems Today.- Types of Insurance Systems.- Germany.- France.- Spain.- Switzerland.- USA.- Interim Conclusion - Suitable Protection System Against Natural Hazards in Response to Climate Change.- Overview of Requirements.- The Appropriate Response to Climate Change.- Legitimacy of Statutory Insurance Against Natural Hazards.- Admissibility Under Swiss Law.- EU Compatibility of the KGV Statutory Insurance System.
