Qualitative Research in the Post-Modern Era

Contexts of Qualitative Research

Qualitative Research is changing as a result of postmodern influences which have changed the way research is interpreted and understood. This has prompted questions which have been knocking at the door of qualitative research for some time now: Who is the researcher in this research account? How does the researcher relate to his/her research? How can the researcher who reads qualitative research relate to and understand the nuances and complexities in qualitative research?

Features
- Represents a more holistic approach to Qualitative Research than has been typical in the past
- Offers a more post-modern interpretation that values the non-linear nature of qualitative research by introducing five research contexts
- Highlights the role of ongoing qualitative research and its connection to individual methodologies
- Invites the reader to engage reflectively with the issues
