Dear reader,

This catalog will help you to find the best Springer books at the end of the year. There is no overlap with the previous quarter’s Preview catalogs. The July-October catalog and the November-December catalog taken together give you a premier listing for any event.

The titles presented here are the highlights of November and December. The best references for libraries, the most important monographs for researchers and the most interesting reads for any specialist in the field are listed. They represent the top sellers amongst the 400+ titles published every month by Springer.

Given the quick pace of electronic production today, some of our books get announced just after a print catalog has been issued. These are the “Fast Track” titles and you will find them listed in the very first pages here since they missed the last catalog. Please take a close look at these brand new titles and include them in your own selections.

With best wishes,

Sandra Cortés
Trade Marketing Manager

P.S. Remember you will find hundreds more good books on springer.com. Use the advanced search to find exactly what you need!
Perioperative Addiction
Clinical Management of the Addicted Patient

E. O. Bryson, E. A. Frost (Eds)

Perioperative Addiction addresses an issue that every anesthesiologist will encounter many times during the course of his or her career: the patient who arrives for operative care under the influence of legal or illegal drugs.

Due November 2011
Contributed volume
2012. XV, 275 p. 53 illus., 26 in color. Hardcover

Informed Consent, Proxy Consent, and Catholic Bioethics

For the Good of the Subject

This work is a comprehensive explanation, rooted in Catholic anthropology and moral theory, of the meaning and limits of informed and proxy consent to experimentation on human subjects. It articulates this rationale in therapeutic and non-therapeutic settings.

Biomedicine /Cardiology

G. W. Barsness, D. R. Holmes, Mayo Clinic Foundation, Rochester, MN, USA (Eds)

Coronary Artery Disease
New Approaches without Traditional Revascularization
Coronary Artery Disease is directed towards individuals with an interest in the clinical treatment of patients with unrevascularizable angina. It explores a variety of treatment options in the setting of a sound scientific background and provide guidance and predictions for future direction in this rapidly developing field. It fulfills an unmet need and is greeted with significant enthusiasm by the practicing internal medicine, family practice and cardiovascular clinicians. It also provides a reliable reference for clinical and basic researchers interested in this topic, as well as affected patients and their families.

Advances and Technical Standards in Neurosurgery

This series, sponsored by the European Association of Neurosurgical Societies, has already become a classic. In general, one volume is published per year. The Advances section presents fields of neurosurgery and related areas in which important recent progress has been made. The Technical Standards section features detailed descriptions of standard procedures to assist young neurosurgeons in their postgraduate training. The contributions are written by experienced clinicians and are reviewed by all members of the Editorial Board.

Due October 2011

Professional book

2012. XII, 266 p. 70 illus., 20 in color. (Advances and Technical Standards in Neurosurgery, Volume 37) Hardcover
