Who Owns Africa?

Examining the Case From a Commoner’s Perspective

A political economy analysis of how Africans have seen their land rights diminished through the received law of colonial and post-colonial state making, the penetration of capital and class formation.

Features

- Highly topical to the current ‘global land grab’ that is mainly affecting Africa
- Covers most of Sub-Saharan Africa, whereas other books focus on one or two country situations
- Story-like account of the fate of land rights profoundly underpinned with facts and academic analysis

Contents

Introduction
- 1. What is Customary Land Tenure?
- 2. How Did Africans Lose Their Land Rights?
- 3. Business as Usual or Real Change?
- 4. Tenure
- 5. Western Political Science Theories and the Development of Political Theories in China (Yang Guangbin and Li Miao, Remin University of China)
- 6. Environmental Politics in China: An Issue Area in Review (Fengshi Wu, Chinese University of Hong Kong)
- 7. The Logic of Comparative Politics and the Development of Political Science Methodology in China (Zhong Yang, University of Tennessee)
- 8. Political Science Research on China: Making the Most of Diversity (Björn Altermann, Universität Würzburg)
- 9. Choices for Chinese Political Science: Methodological Positivism or Methodological Pluralism? (Jon R. Taylor, University of St. Thomas)
- 10. The Perestroika Movement in American Political Science and its Lessons for Chinese Political Studies (Shelley Rigger, Davidson College)
- 11. Reflections on Scientific Inquiry, Academic Freedom, and Enlightenment (Jeffrey C. Isaac, Indiana University)

New Series
Public Administration and Information Technology

Series editor: C. G. Reddick

Public Administration and Information Technology publishes authored and edited books that examine the application of information systems to common issues and problems in public administration. This series examines both the successes of Information and Communication Technology (ICT) adoption and some of the most important challenges to implementation. The books published in this series will address all areas of public administration, through the use of information technology adoption in the public and nonprofit sectors, and in the private sector where important lessons can be learned for public managers and policy analysts. New and emerging technologies that will have a lasting impact on public administration will be featured in this series. Both developed and developing countries will be examined in this series. The series particularly welcomes books that cover international dimensions of public administration and information technology. The research in this series will be able to bridge both theory and practice to provide relevance to public managers. The series will cover all aspects of e-government/e-government research, and new and emerging trends and issues in this research. The series publishes edited books, monographs, upper-level textbooks and research handbooks. For authors interested in submitting a book proposal, please email the editor. Prof. Christopher Reddick, The University of Texas at San Antonio, USA, chris.reddick@utsa.edu

Due June 2012

2012, VIII, 339 p. 27 illus., 16 in color. (Public Administration and Information Technology, Volume 1) Hardcover
► approx. $139.00
ISBN 978-1-4614-1447-6

Aging in Hong Kong
A Comparative Perspective

With the longest life expectancy for men and the second longest for women, Hong Kong typifies our planet’s aging population. The daily lives of its older adults closely match the advantages and disadvantages experienced by urban elders in other developed countries. For these reasons, Hong Kong’s elderly serve as a salient guide to older people’s social, psychological, and healthcare needs—concerns of increasing importance as the world grows older.

Features
- Represents a collection of essays that addresses the theme of how Hong Kong deals with the World Health Organization’s call to ‘Aging Well’
- Adopts an integrated medical and social approach, examining issues relating to aging from the older person’s perspective
- Helps raise awareness of the diverse pressing issues facing aging societies in developed countries
