The Multifaith Movement: Global Risks and Cosmopolitan Solutions

This book documents the ultramodern rise of the multifaith movement, as multifaith initiatives have been increasingly deployed as cosmopolitan solutions to counter global risks such as terrorism and climate change at the turn of the 21st century. These projects aim to enhance common security, particularly in Western societies following the events of September 11, 2001 and the July 2005 London bombings, where multifaith engagement has been promoted as a strategy to counter violent extremism.

Features
► First in-depth sociological study investigating the multifaith movement, contributing new evidence to challenge the secularisation theory
► First book clearly explaining the role that multifaith initiatives play in countering terrorism
► New theoretical Netpeace framework, providing a missing narrative within the sociology of religion literature
