On the Death of the Pilgrim: The Postcolonial Hermeneutics of Jarava Lal Mehta

This searching examination of the life and philosophy of the twentieth-century Indian intellectual Jarava Lal Mehta details, among other things, his engagement with the oeuvres of Martin Heidegger, Hans-Georg Gadamer, and Jacques Derrida. It shows how Mehta’s sense of cross-cultural philosophy and religious thought were affected by these engagements, and maps the two key contributions Mehta made to the sum of human ideas. First, Mehta outlined what the author dubs a ‘postcolonial hermeneutics’ that uses the ‘ethnotrope’ of the pilgrim to challenge the philosophical hermeneutic emphasis on supplementation and augmentation. For Mehta, the hermeneutic encounter ruptures, rather than supplements, the self.

Features

► “The only full-length study of this important Hindu philosopher”
► Identifies the ethical pitfalls of deconstructivism’s employment of the messianic and its implicit ties to ontotheology’s metaphysics of presence
► Extrapolates for the first time Mehta’s alternative to the philosophical hermeneutic emphasis on return and edification

**Resistance, Liberation Technology and Human Rights in the Digital Age**

This book explains strategies, techniques, legal issues and the relationships between digital resistance activities, information warfare actions, liberation technology and human rights. It studies the concept of authority in the digital era and focuses in particular on the actions of so-called digital dissidents. Moving from the difference between hacking and computer crimes, the book explains concepts of hacktivism, the information war between states, a new form of politics (such as open data movements, radical transparency, crowd sourcing and "Twitter Revolutions"), and the hacking of political systems and of state technologies.

**Features**

- Deals with digital resistance activities all over the world
- First book to describe political and human rights issues in Egypt, Tunisia, Cuba and Yemen
- A critical analysis of the WikiLeaks case

**Contents**

**Fields of interests**

Philosophy of Law; Media Law; Legal Aspects of Computing
