B. Bhatta, Jadavpur University, Kolkata, India

Research Methods in Remote Sensing

This book introduces the overall concepts of research methods in Remote Sensing. It also addresses the entire research framework, ranging from ontology to documentation. As such, it covers the theory while providing a solid basis for engaging in concrete research activities. It is not intended as a textbook on remote sensing; rather, it offers guidance to those conducting research by examining philosophical and other issues that are generally not covered by textbooks. Various stages of research are discussed in detail, including illustrative discussions and helpful references. The topics considered in this book cover a part of the research methodologies explored in Master of Philosophy (M.Phil.) and Doctor of Philosophy (Ph.D.) programs. The book's physical format has been kept to a compact, handy minimum in order to maximize its accessibility and readability for a broad range of researchers in the field of remote sensing.

Contents

Fields of interest
Remote Sensing/Photogrammetry; Geotechnical Engineering & Applied Earth Sciences; Signal, Image and Speech Processing

Target groups
Research

Product category
Brief

A. Khare, T. Beckman, Athabasca University, St. Albert, AB, Canada (Eds)

Mitigating Climate Change: The Emerging Face of Modern Cities

Contents

Fields of interest
Landscape/Regional and Urban Planning; Climate Change; Environmental Management

Target groups
Research

Product category
Monograph

Due April 2013

2013. X. 128 p. 5 illus., 3 in color. (SpringerBriefs in Earth Sciences) Softcover
► $49.95
ISBN 978-94-007-6593-1

2013. XXI. 294 p. 66 illus., 46 in color. (Springer Environmental Science and Engineering) Hardcover
► $129.00
ISBN 978-3-642-37029-8

E. Liebenberg, University of South Africa, Pretoria, South Africa; P. Coller, University of Portsmouth, UK; Z. G. Török, Eotvos Lorand University, Budapest, Hungary (Eds)

History of Cartography: International Symposium of the ICA, 2012

Features
► Presents information previously unavailable on cartographic projects undertaken in the 19th and 20th centuries ► Reports on research projects in the history of cartography undertaken at tertiary institutions worldwide ► An important aid to educators teaching the development of geographical information science

Contents

Field of interest
Geographical Information Systems/Cartography

Target groups
Research

Product category
Monograph

Due April 2013

2013. VII. 252 p. 145 illus., 25 in color. (Lecture Notes in Geoinformation and Cartography / Publications of the International Cartographic Association (ICA)) Hardcover
► $179.00
ISBN 978-3-642-33316-3
