Simulations for Personnel Selection

This book provides a comprehensive and state-of-the-art overview of simulation development, technologies, and implementation, including real-world examples and results followed by a preview of what's on the horizon that will further revolutionize the industry.

Features

► Provides comprehensive coverage of the latest selection and most innovative simulation technologies currently in use for employee selection
► Provides “real world” examples of how simulations work in practice
► Contributors are recognized leaders in this area, Ben Hawkes, Eric Sydell, Deborah Rupp

Contents

New Series

Advances in Behavior Genetics

Series editor: Y.-K. Kim

The Springer series Advances in Behavior Genetics focuses on the interdisciplinary area combining the behavioral sciences and genetics. The study of behavior genetics has become increasingly important as rapid advances in molecular genetic techniques lead to quicker discovery of genes involved in complex behavior disorders. It has now become a vast common ground for scientists from very diverse fields including psychology, psychiatry, neurology, endocrinology, biochemistry, neuroimaging, as well as genetics. The series Advances in Behavior Genetics seeks to document the changing landscape of the field as it continues to progress from comparatively small studies to consortia-based efforts that target the inherited components of complex diseases and behaviors with thousands of participants. With reviews of up-to-date literature of current topics and issues in behavior genetics the series will direct future research for students and researchers in behavior genetics.

Features

► Lifespan perspective that acknowledges the accumulating impact of genetic and environmental influences
► Inclusion of research on both normative and non-normative cognitive functioning
► Input from related fields of physiology and animal behavior that elucidates current research and points to possible future research directions

Contents

Fields of interest

Psychology Research; Human Genetics; Psychiatry

Behavior Genetics of Cognition Across the Lifespan

Along with psychopathology, cognition has been one of the primary phenotypic focal points of the field of behavior genetics since its inception. Francis Galton’s 1874 examination of eminent families in Britain was among the earliest attempts to investigate whether cognitive achievements ran in families. This volume presents current methodologies for understanding cognitive abilities that move beyond the outdated nature vs. nurture paradigm.

Features

► Lifespan perspective that acknowledges the accumulating impact of genetic and environmental influences
► Inclusion of research on both normative and non-normative cognitive functioning
► Input from related fields of physiology and animal behavior that elucidates current research and points to possible future research directions

**Skill and knowledge acquisition for complex technical tasks**

A Human Factors Perspective on Learning Process and Training Design in High Reliability Organizations

This book provides the first comprehensive literature review on the acquisition and retention of complex skills in High Reliability Organizations. Based on this review, it introduces a theoretical model of how skill and knowledge acquisition for complex tasks is accomplished and shows how this model can be used to derive training methods and instructional techniques.

**Features**
- Introduces a new theoretical framework to understand the learning process of a complex task from a Human Factors perspective
- Integrates theoretical approaches of individual skill acquisition and adult learning into a new comprehensive framework for real-world tasks in control rooms of High Reliability Organizations (HROs)
- Bridges the gap between traditional learning theory and the training development for workers dealing with highly complex technical systems

**Contents**

Chapter 1. Complex tasks: Description and occupations in which they can be found.

Chapter 2. Required knowledge and skills and their acquisition - Components of theoretical model.

Chapter 4. Supporting skill and knowledge acquisition in the High Reliability Organization.

**Fields of interest**
- Industrial, Organisational and Economic Psychology
- Operations Research, Management Science
- Lifelong Learning/Adult Education

**Target groups**
- Research

**Handbook of Forensic Sociology and Psychology**

**Contents**

- Evolving Practice Parameters of Forensic Criminology
- The Work of the Sociologist as Mitigation Expert in Cases of Violent Crime
- “Oh, Stop That Cursed Jury”
- The Problem of Interrogation-Induced False Confession
- Sources of Failure in Prevention and Detention
- “Brainwashing” as Forensic Evidence
- Target Selection by Criminal Groups and Gangs
- Gangs in the Workplace
- The Role of a Gang Expert in Court
- Competence to Proceed and Juvenile Courts
- Competency Evaluations for Adult Defendants
- Neuropsychological Evaluations of Hispanics
- Sociological Testimony in Employment- and Education-Related Litigation
- Preventing Workplace Violence and Litigation through Pre-Employment Screening and Enforcement of Workplace Conduct Expectations
- Critical Issues in the Evolving Diagnosis of PTSD
- Sociological Evidence in Suicide Litigation
- Sociological Data in the Evolving Practice Parameters of Forensic Criminology
- Sociological Evidence in Product Liability Litigation
- Sociological Evidence in Human Factors-Related Litigation
- Sociological Testimony in Alcohol- and Other Drug-Associated Litigation
- Sociological Theory and Methods in Toxic Tort Lawsuits
- Child Custody Evaluations
- Parental Alienation
- Anger
- Forensic Evaluation of Child Abuse
- Sociological Evidence in Abuse Litigation
- Using Expert Witnesses in Immigration Hearings/Court
- Forensic Sociology: The Case of Honor Killing in the Muslim World

**Fields of interest**
- Law and Psychology
- Sociology, general
- Criminology & Criminal Justice

**Target groups**
- Research

Cultural Psychology of Cinema
Historical Themes and Perspectives

This book demonstrates how social distress or anxiety is reflected, modified, and evolves through the medium of the motion picture. Tracing cinema from its earliest forms, the authors show how film is a perfect medium for generating and projecting dreams, fantasies, and nightmares, on the individual as well as the societal level. Arising at the same time as Freud's influential ideas, cinema has been intertwined with the wishes and fears of the greater culture and has served as a means of experiencing those feelings in a communal and taming environment.

Features
► Concise review of key ideas on the social meaning of cinema ► Unique historical narrative traces analyses of film content ► Exploration of major mythic themes such as the lone hero, ► apocalyptic visions, redemption, chaos, war
