New Series
SpringerBriefs in History of Science and Technology

SpringerBriefs present concise summaries of cutting-edge research and practical applications across a wide spectrum of fields. Featuring compact volumes of 50 to 125 pages, the series covers a range of content from professional to academic. Typical topics might include: • A timely report of state-of-the-art analytical techniques • A bridge between new research results, as published in journal articles, and a contextual literature review • A snapshot of a hot or emerging topic • An in-depth case study or clinical example • A presentation of core concepts that students must understand in order to make independent contributions SpringerBriefs in History of Science covers a broad range of fields including: History of Physics, Chemistry, Biology, Technology, Mathematics, Computer Science etc. SpringerBriefs are characterized by fast, global electronic dissemination, standard publishing contracts, standardized manuscript preparation and formatting guidelines, and expedited production schedules. Both solicited and unsolicited manuscripts are considered for publication in the SpringerBriefs in History series. Potential authors are warmly invited to complete and submit the Briefs Author Proposal form. All projects will be submitted to editorial review by external advisors. SpringerBriefs are characterized by expedited production schedules with the aim for publication 8 to 12 weeks after acceptance and fast, global electronic dissemination through our online platform SpringerLink. The standard concise author contracts guarantee that • an individual ISBN is assigned to each manuscript • each manuscript is copyrighted in the name of the author • the author retains the right to post the pre-publication version on his/her website or that of his/her institution.

Features
► Describes the little-known history of the machines of human sex research in the postwar era ► Shows how researchers worldwide invented and used machines to study human sexuality and the body in new ways, and how they used and improved each other’s designs ► Relates the relationship between the machines of sex research to Cold War sexualities and gender and sexual liberation movements ► Narrates how the machines of sex research led to new ways of thinking about human bodies as sexual yet nonreproductive sites of pleasure

Contents
Acknowledgements. • Chapter 1: The Machines of Sex Research. • Chapter 2: The Penile Strain Gauge and Aversion Therapy: Measuring and Fixing the Sexual Body. • Chapter 3: The Couples Laboratory and Aversion Therapy: Measuring and Fixing the Sexual Body. • Chapter 4: The Vaginal Photoplethysmograph and Devices for Women: Gauging Female Arousal. • Conclusion: The Future of Human Sex Research Technologies.
