Creating Learning Environments

This superbly researched study offers a chalk-face perspective on the secret of Finland’s educational success. Providing an intimate and revealing portrait of the Nordic nation’s schools and its teacher training system, it sets out to explain why Finland’s students consistently rank top, with low variance and moderate inputs, among OECD countries across the range of criteria, from reading to mathematics. Alongside the detailed analysis culled from many hours of interviews with teachers and principals and dozens of visits to school throughout the country, the author maps the educational landscape of Finland: the sector’s history, culture and development, its guiding principles, methodologies, and learning environments.

The book’s pre-publication version on his/her website or that each manuscript is copyrighted in the name of an individual ISBN is assigned to each manuscript standard concise author contracts guarantee that: acceptance and fast, global electronic dissemination through our online platform SpringerLink. The briefs are available for individual print and electronic purchase. SpringerBriefs in Education cover a broad range of educational fields such as: Science Education, Higher Education, Educational Psychology, Assessment & Evaluation, Language Education, Mathematics Education, Educational Technology, Medical Education and Educational Policy. SpringerBriefs typically offer an outlet for: An introduction to a (sub)field in education summarizing and giving an overview of theories, issues, core concepts and/or key literature in a particular field A timely report of state-of-the-art analytical techniques and instruments in the field of educational research A presentation of core educational concepts An overview of a testing method A snapshot of a hot or emerging topic or policy change An in-depth case study A literature review A report/review study of a survey An elaborated thesis Both solicited and unsolicited manuscripts are considered for publication in the SpringerBriefs in Education series. Potential authors are warmly invited to complete and submit the Briefs Author Proposal form. All projects will be submitted to editorial review by editorial advisors. SpringerBriefs are characterized by expedited production schedules with the aim for publication 8 to 12 weeks after acceptance and fast, global electronic dissemination through our online platform SpringerLink. The standard concise author contracts guarantee that: an individual ISBN is assigned to each manuscript each manuscript is copyrighted in the name of the author the author retains the right to post the pre-publication version on his/her website or that of his/her institution.
### Heteroglossia as Practice and Pedagogy

**Contents**
- Foreword
- Part I: Antecedents and Present Developments in Universal Preschool Education
  - The Evolution of Universal Preschool Education in a Global Age: Louise Boyle Swiniarski
  - Climbing the Mountain: The Journey to Quality Pre-Kindergarten in Tennessee: Rebecca Isbell
  - Florida's Voluntary Universal Prekindergarten: A Citizen's Initiative Taking Baby Steps: Lynn Harre and Alisa S. Ghazvini
- Part II: Curriculum Initiatives for Early Childhood Programs in a Global Age
  - Opening Doors in Northern Chile: The International School of Arica: Michelle Pierce
  - Girls in the Primary Science Classrooms of Wales: Theorizing Beyond Dominant Discourses of Gender: Cletus Cervoni
  - Let's Get Talking: Promoting Communication, Language and Literacy for Young Children in Multicultural England: Avril Brock
- Part III: Beyond the Walls of the School and Center
  - Ryhme Times Treasure Baskets and Books: How Early Years Libraries Can Help to Deliver the Best Start: Carolynn Rankin
  - The Politics of Play in England: An Appeal to Deliver the Best Start: Carolynn Rankin
  - Beyond the Walls of the School and Center: China's Educational Reform and its Impact on Early Childhood Curriculum: Yaoying Xu and Ping Liu
- Part IV: Universal Preschool Education
  - Universal Prekindergarten: A Citizen's Initiative Taking Baby Steps: Lynn Harre and Alisa S. Ghazvini
  - The Evolution of Universal Preschool Education in a Global Age: Louise Boyle Swiniarski

### Discourses on Professional Learning

**The contributions in this volume explore theoretical and empirical analyses on the boundary between working and learning in various contexts and with various methodological approaches.**

The main focus of the book is the merge of work activities and learning. In the early decades of the twentieth century, at the peak of industrialisation, the distinct separation of working and learning was the dominant principle—the early concepts of work organisation even distinguished between working and thinking by consequently separating planning of work from executing the work. Within the ongoing discussion on life-long learning and the establishment of modern business concepts which aimed at meeting the demands of permanent change by implementing flexible work structures, the legitimate interest on workplace learning has been continually increasing in recent years. Current approaches emphasise the learning potential of workplaces, combining the application of competence (i.e. working) and its acquisition (i.e. learning).

**Features**
- Provides a general approach to elaborate and analyse learning processes within work environments
- Includes competing theoretical and methodological approaches and perspectives
- Offers a compact outline on an emerging field of research based on current research by a distinguished group of international researchers

**Fields of interest**
- Professional and Vocational Education
- Lifelong Learning

**Target groups**
- Research

Prospective Mathematics Teachers’ Knowledge of Algebra Teaching in China and the United States of America

Rongjin Huang examines teachers’ knowledge of algebra for teaching, with a particular focus on teaching the concept of function and quadratic relations in China and the United States. 376 Chinese and 115 U.S.A. prospective middle and high school mathematics teachers participated in this survey. Based on an extensive quantitative and qualitative data analysis the author comes to the following conclusions: The Chinese participants demonstrate a stronger knowledge of algebra for teaching and the Chinese participants’ structure of knowledge of algebra for teaching is much more interconnected. Chinese participants show flexibility in choosing appropriate perspectives of the function concept and in selecting multiple representations. Finally, the number of college mathematics and mathematics education courses taken impacts the teachers’ knowledge of algebra for teaching.

Feature
► Publication in the field of natural sciences

Contents
Knowledge Needed for Teaching - Mathematics Teacher Education in China and the U.S.A. - Instrumentation, Data Collection, and Data Analysis - Comparison of Knowledge of Algebra for Teaching (KAT) between China and the U.S.A. - Relationship among Different Components of KAT - Comparison of KTCF between China and the U.S.A.

The Action Research Planner
Doing Critical Participatory Action Research

A fully-updated and reworked version of the classic book by Stephen Kemmis and Robin McTaggart, now joined by Rhonda Nixon, The Action Research Planner is a detailed guide to developing and conducting a critical participatory action research project. The authors outline new views on ‘participation’ (based on Jürgen Habermas’s notion of a ‘public sphere’), ‘practice’ (as shaped by practice architectures), and ‘research’ (as research within practice traditions).

Features
► A step-by-step guide to planning critical participatory action research projects ► Provides concise and readable illustrative examples ► Provides practical resources to assist new and experienced action researchers planning a study ► Provides a theoretical framework that explains ‘participation’, ‘practice’ and ‘research’ ► Fully updated new edition of a classic of Action Research literature

New Series
Research in Mathematics Education

Series editors: J. Cai, J. Middleton

The vision of this series is to rapidly deploy the latest, best research on mathematics education. The editors of in this series select the reviewed papers and articles from the American Educational Research Association annual meeting (SIG/RME), the Research Pre-session of the Annual Meeting of the National Council of Teachers of Mathematics (NCTM) and develop those articles into edited volume(s). The volumes represent the latest research in the field and are geared towards highlighting the work of bright, graduate students and junior faculty, working in conjunction with senior scholars.
