Common Commercial Policy after Lisbon

Since the beginning of the process of European integration the EU Common Commercial Policy (CCP) has been one of the most dynamic political fields. The EU has achieved a leading role among the economic superpowers and is regarded as a single economic area in which the EU speaks also on behalf of its Member States for most aspects of external economic politics. This volume analyzes the implications of the Treaty of Lisbon for the Common Commercial Policy of the EU. The Lisbon Treaty has declared all matters concerning external commercial policy as exclusive competences of the EU. Which consequences does this have for the Member States of the EU? With regard to institutional [...] More on www.springer.com/978-3-642-34254-7

European Ship Recycling Regulation

Entry-Into-Force Implications of the Hong Kong Convention

This study provides an in-depth analysis of the Hong Kong Ship Recycling Convention as adopted in May 2009 and a thorough analysis of the overall status quo of ship recycling regulations. It investigates the lack of sufficient ratifications of the Convention from both a legal and an economic perspective. The first part of the study focuses on the history of the Convention’s entry-into-force provision and the rationale behind it. Due to the fact that this provision provides a considerable additional obstacle to the Convention’s becoming legally binding, in the second part the focus of the work shifts to unilateral action in this field. An overview of the legal environment of European [...] More on www.springer.com/978-3-642-34254-7

Regulations Regarding Living Organ Donation in Europe Possibilities of Harmonisation

Organ transplantation is a much-discussed subject, and the importance of living organ donation is increasing significantly. Yet despite all efforts, too few donor organs are available to help all patients in need. This book analyses whether the national legal regulations are also partly responsible for the organ shortage in the Member States of the European Union. In addition to a detailed analysis of the various national regulations, the main arguments in favour of and against legal restrictions on living organ donation are considered. Furthermore, the European Union’s authority is investigated, namely, whether it is entitled to establish statutory provisions for the Member States [...] More on www.springer.com/978-3-642-33798-7

Chinese Tax Law and International Treaties

The People’s Republic of China’s tax policies and international obligations are as multifaceted and dynamic as they are complex, developing closely with the nation’s rise to the world’s fastest-growing major economy. Today, after decades of reform and the entry into the World Trade Organization, China has developed regulatory systems that enable it to provide stable administration, including a tax structure. China’s main tax reform can be attributed to the enactment of the Enterprise Income Tax Law, which came into effect on January 1, 2008. Chinese tax regulations include direct taxes, indirect taxes, other
taxes, and custom duties and from a collection point of view, China’s tax[...]

**Detection of Melt Ponds on Arctic Sea Ice with Optical Satellite Data**

A. Rösel, University of Hamburg, Hamburg, Germany

The Arctic sea ice is characterized by profound changes caused by surface melting processes and the formation of melt ponds in summer. Melt ponds contribute to the ice-albedo feedback as they reduce the surface albedo of sea ice, and hence accelerate the decay of Arctic sea ice. To quantify the melting of the entire Arctic sea ice, satellite based observations are necessary. Due to different spectral properties of snow, ice, and water, theoretically, multi-spectral optical sensors are necessary for the analysis of these distinct surface types. This study demonstrates the potential of optical sensors to detect melt ponds on Arctic sea ice. For the first time, an Arctic-wide.[...]

**The Rationality and Justification of Legislation**

L.J. Wintgens, University Brussels/University Leuven, Brussels/Leuven, Belgium; A.D. Oliver-Lalana, University of La Rioja, Logroño, Spain (Eds.)

**Essays in Legisprudence**

The essays collected in this book address legislation from the viewpoint of legal theory and provide an overview of current research in legisprudence as a new scholarly approach to lawmaking. The overall focus of the volume is on the justification of legislation, with a special emphasis on the intricate notion of legislative rationality. With the rational justification of legislation as their central theme, the essays elaborate on the foundations and bounds of legislation and the search for a more principled lawmaking, discuss the role of legislation within the framework of democratic constitutionalism, analyze legislation as implementation of constitutional law, and explore how[...]
