Mental Disorders in Ancient Philosophy

This book offers a comprehensive study of the views of ancient philosophers on mental disorders. Relying on the original Greek and Latin textual sources, the author describes and analyses how the ancient philosophers explained mental illness and its symptoms, including hallucinations, delusions, strange fears and inappropriate moods and how they accounted for the respective roles of body and mind in such disorders. Also considered are ethical questions relating to mental illness, approaches to treatment and the position of mentally ill people in societies of the times.

Contents
- Introduction
  - Chapter 1. Medical and Cultural Background
  - Chapter 2. Plato on madness and mental disorders
  - Chapter 3. The Aristotelian concept of mental disorders
  - Chapter 4. The Stoics on the kinds of madness
  - Chapter 5. Galen on the diseases of the mind and soul
- Other philosophical traditions
- Appendix A. Philosophers as mental patients in ancient tradition
- Appendix B. Philosophers as mental patients in ancient tradition

Fields of interest

Vague Objects and Vague Identity

Contents
- Preface; Ken Akiba and Ali Abasnezhad
- Introduction; Ken Akiba
- Part 1. Mereological Vagueness
  - Mereological indeterminacy: metaphysical but not fundamental
  - Thomas Sattig: A linguistic account of mereological vagueness
- Maureen Donnelly
- Part 2. Varieties of Ontic Vagueness
  - Vague objects in quantum mechanics
  - George Darby
- Vague persons
  - Kristie Miller
  - Indistinguishable but not identical looks: non-vague phenomenal predicates and phenomenal properties
  - Elisa Paiganini
- Attitudes, supervaluations and vagueness in the world
  - Angel Pinillos
- Part 3. Formal Issues
  - Boolean-valued sets as vague sets
  - Ken Akiba
  - One bald man, two bald men, three bald men, aahh aahh aahh
- Nicholas J. Smith
- Vagueness and abstraction
- Stewart Shapiro
- Part 4. Ontic Supervaluationism
  - Vagueness in the world: a supervaluationist approach
  - Ali Abasnezhad and Davood Hosseini
  - What could vague objects possibly be?
  - Dan Lopez de Sa
- Part 5. Vague Identity
  - Some comments on Evans’s proof
  - Brian Garrett
  - Vague existence implies vague identity
  - David B. Hershenov
- Castles built on clouds: vague identity and vague objects
  - Benjamin L. Curtis and Harold W. Noonan
- Evans tolerated; Elia Zardini

Ethics and Technology Assessment: A Participatory Approach

Whether it is nuclear power, geo-engineering or genetically modified foods, the development of new technologies can be fraught with complex ethical challenges and political controversy which defy simple resolution.

Features
- Addresses the theory, methods and practice of participatory technology assessment (pTA) in relation to large-scale technological and environmental policies and programs
- Presents a practical and participatory decision procedure that facilitates the non-specialists’ deliberations on the ethical aspects of controversial technologies
- Develops and discusses an ethical decision-support procedure termed “Reflective Ethical Mapping” (REM), and evaluates it in a practical context: radioactive waste management in nuclear communities

Contents
- Acknowledgements
- List of abbreviations
- Risk and public involvement in technology governance
- Ethics and technology
- Pragmatism, public deliberation and technology ethics
- Ethical tools
- Reflective Ethical Mapping

Fields of interest
- Philosophy of Technology
- Industrial and Production Engineering
- Environmental Economics

**The Moral Status of Technical Artefacts**

**Contents**
1. Agency in Humans and in Artifacts: A Contested Discourse; Carl Mitcham.
2. Towards a post-human intra-actional account of sociomaterial agency (and Morality); Lucas Introna.
3. Which came first, the donor or the deed?; Allan Hanson.
4. Some misunderstandings about the moral significance of technology; Peter-Paul Verbeek.
5. “Guns don’t kill, people kill”; values in and/or around technologies; Joe Pitt.
6. Can technology embody values?; Ibo van de Poel and Peter Kroes.
7. From moral agents to moral factors: the structural ethics approach; Philip Brey.
8. Artefactual agency and artefactual moral agency; Deborah G. Johnson and Anthonie Meijers.
9. Artefacts, agency, and action schemes; Christian Illies and Anthonie Meijers.
10. Artificial agents and their moral nature; Luciano Floridi.
11. The good, the bad, the ugly and the poor: instrumental and non-instrumental values of artefacts; Maarten Franssen.
12. Values in Chemistry and Engineering; Sven Ove Hansson.
