EURASIP Journal on Wireless Communications and Networking

Special Issue on Experimental Evaluation in Wireless Communications

The importance of measurement results is often undervalued in signal processing and in particular in the wide application fields of wireless transmissions. This special issue will bring together research results obtained by measurements explaining shortcomings in current state of the art modeling and understanding of wireless communication systems.

Potential topics include, but are not limited to cellular transmissions such as:

- LTE-A
- Interference alignment techniques
- Vehicular transmissions
- Wireless sensor networks

Guest editors
Jose A. Garcia-Naya, University of A Coruña | jagarcia@udc.es
Javier Via, University of Cantabria | jvia@gtas.dicom.unican.es
Florian Kaltenberger, Eurecom, Sophia Antipolis | Florian.Kaltenberger@eurecom.fr
Robert W. Heath Jr., The University of Texas in Austin | rheath@ece.utexas.edu
Submission instructions:

Before submission authors should carefully read over the Instructions for Authors, which are located at jwcn.eurasipjournals.com/authors/instructions. Prospective authors should submit an electronic copy of their complete manuscript through the SpringerOpen submission system at jwcn.eurasipjournals.com/manuscript according to the submission schedule. They should choose the correct Special Issue in the “sections” box upon submitting. In addition, they should specify the manuscript as a submission to the “Special Issue on Experimental Evaluation in Wireless Communications” in the cover letter. All submissions will undergo initial screening by the guest editors for fit to the theme of the Special Issue and prospects for successfully negotiating the review process.
