Instructions for authors
Netherlands Heart Journal

The Netherlands Heart Journal is an English language, peer-reviewed journal and is published 11 times a year. The journal aims to publish high-quality papers on a wide spectrum of cardiovascular medicine, with a focus on both clinical and experimental observations. This includes original papers, study design articles, review articles, points of view, heart beats and letters to the editor. Each issue contains educational information such as an e-learning article and a rhythm puzzle. Once or twice a year a special issue is published with the main focus on a particular subject in cardiovascular medicine.

Online submission
The Netherlands Heart Journal uses Editorial Manager, a web-based manuscript submission and review system that tracks manuscripts through the production process. Authors can only submit their manuscripts online. Online submission facilitates the submission of manuscripts from authors, streamlines the reviewing process, substantially reduces the editorial processing and reviewing times, and shortens overall publication times.

Upload all of your manuscript files following the instructions given on the screen: http://nehj.edmgr.com. First-time users must click ‘Register’ on the navigation menu at the top of the screen. The system will send an automatic email with your user name and password. Detailed guidelines for authors are available on the submission site.

Submission of a manuscript implies that the work described has not been published before; that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as by the responsible authorities – tacitly or explicitly – at the institute where the work was carried out. The publisher will not be held legally responsible should there be any claims for compensation. Authors are responsible for acquisition of all data, analysis and interpretation of the data.

Permission
Authors wishing to include figures, tables, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner for both the print and online format and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Open access
The journal is an Open Access journal. Authors do not have to pay for submitting an article. All articles have undergone a peer review and are free to access and download from: http://link.springer.com/journal/12471. They are published with CrossMark® to maintain the publication records.

ORCID ID: An ORCID iD is a non-proprietary alphanumeric code that uniquely identifies an academic author. Publishers use it to unambiguously attribute any published work to the correct authors. It is a not-for-profit association of publishers and academic organisations that maintains the central registry of these personal identifiers and associated public profiles for authors in academic publishing. Please visit http://orcid.org/ for more information.

Article categories
The Netherlands Heart Journal accepts the following categories of articles:

© Lieda Meester, May 2019
• **Original article** - a detailed study reporting original research containing a background, methods, results, interpretation of findings, and a discussion on the implications. The paper has a maximum of 2200 words, 30 references, 4 figures and 3 tables and includes a structured abstract of 250 words.
  - Insert a *what's new* of no more than 100 words; What's new? Please provide three to six bullet points that convey the key findings of the paper and highlight what is new or significant. This is a compulsory item and should be uploaded as a separate file in the drop-down menu.
• **Review article** - an overview of existing literature, often identifying specific issues or problems and providing an analysis of data from published work on the subject. A review contains an abstract of 200 words, maximum of 3000 words, 50 references, 5 figures and 4 tables.
• **Study design article** - a report on planned or ongoing research studies. If data collection is complete, we will not consider the manuscript in this category. The text contains a structured abstract of 250 words, a maximum of 2200 words, 30 references, 4 figures and 3 tables.
• **Point of view** - may address any important issues in the field of cardiovascular medicine. This can challenge conventional ideas, guidelines, methods or procedures used in a particular study, which could invite further discussion or debate. Or be a position taken on areas of clinical importance for which there is a need for guidance on diagnostic and therapeutic management. The text contains an abstract of 200 words, maximum of 1500 words, 30 references, 5 figures and 4 tables.
• **Heart beat (short case)** - has a maximum of 150 words, 5 references and 1 figure (which may be subdivided into A and B). No abstract and keywords are needed. In the print version, this category may not consist of more than 1.5 pages. If the print version exceeds this limit, the journal editor will ask you to shorten your text.
• **Commentary** - has a maximum of 1000 words, 5 references, 1 figure, no tables and is on invitation only, to be published together with an article.
• **Rhythm puzzle** - submit as two separate submissions:
  - Question: maximum of 150 words, 3 references and 2 figures.
  - Answer: maximum of 250 words, 3 references and 2 figures.
• **Image puzzle** - submit as two separate submissions:
  - Question: maximum of 250 words and, 1 figure (panel A and B permitted)
  - Answer: maximum of 250 words and 4 references.
• **Letter to the Editor** - maximum of 500 words, three references, no figures and no tables.
• **Editor's comment** - maximum of 1000 words, 15 references, no figures and no tables.

*Figures for this category should not be larger than 100 (height) x 110 (width). Authors are encouraged to include videos with the submissions which can be published as supplementary files online.*

**Preparation of manuscripts**

**The title page should include:** a concise and informative title; names of all authors with their affiliations and addresses, and the email address and telephone number of the corresponding author; word count; and number of tables and figures.

**Authors affiliations:** provide full initials and last name for each author. Do not use first names!

**Abstract:** please provide a structured abstract with a maximum of 250 words for original papers and study design articles, and an unstructured abstract of 200 words for review articles and points of view. The abstract should not contain any undefined abbreviations, no references and tables. An abstract is a short statement about your research or project designed to give the reader a complete, yet concise, understanding of your paper’s research and findings. It gives a thorough overview of
your paper or project so that a busy reader can decide whether to read the entire paper.

**Keywords:** please provide 3 to 6 keywords which can be used for indexing purposes (use MeSH terms, see: [www.nlm.nih.gov/mesh/meshhome.html](http://www.nlm.nih.gov/mesh/meshhome.html)).

**Text formatting**

- Manuscripts should be submitted in Word; save your file in doc format.
- Use British English spelling, not American. **We will not accept articles with a poor standard of English.** Please refer to the section on language editing.
- Use normal, plain font (Times Roman pt 10) for text.
- Use the automatic page numbering function to number the pages.
- Do not use any field functions.
- Use tab stops or other commands for indents, not the space bar.
- Use the table function, not spreadsheets, to make tables.
- Use the equation editor or Math Type for equations.
- References must be in Vancouver style.
- Use SI units for all scientific and laboratory data.
- Do not use the symbols for trademark (™) or registered trademark (®).

**Headings:** use no more than three levels of displayed headings.

**Abbreviations:** to improve clarity and readability, abbreviations should be used very sparingly. Only use for terms appearing regularly throughout the text. At first appearance, an abbreviated term should be written out in full, with the abbreviation following immediately in parentheses. Use the abbreviation consistently thereafter. Do not abbreviate single words. Do not use in titles. **Abstract:** abbreviations should only be used in the abstract if the term is used again at least 3 times, or for long terms to improve readability. Do not use abbreviations solely to limit the word count. **Tables and figures:** Abbreviations may be used in tables and figures if they are defined in the table footnotes and figure legends.

**Electronic Supplementary Material (EMS):** is material directly relevant to the conclusion of a paper that cannot be included in the printed version for reasons of space or medium (e.g. moving images, questionnaires, or background data). It will be included in the peer-review. As this material does not undergo language-editing, please ensure that it is clearly and succinctly presented, and that the terms conform with the rest of the paper and the NHJ style (e.g. British-English spelling). Authors may not alter a data supplement after a paper is accepted by the Editor.

**Acknowledgements:** important contributions of individuals should be noted in the Acknowledgement section, placed after the main text. This is optional.

**Sources of funding:** details of all funding sources for the work in question should be given in a separate section entitled 'Funding'. This should appear after the 'Acknowledgements' section. The sentence should begin: ‘This work was supported by ...’.

**Conflict of interests:** all authors must make a formal statement at the time of submission indicating any potential conflict of interests that might constitute an embarrassment to any of the authors if it were not to be declared and were to emerge after publication. Such conflicts might include, but are not limited to, shareholding in or receipt of a grant or consultancy fee from a company whose product features in the submitted manuscript or which manufactures a competing product. Netherlands Heart Journal follows the guidelines of the International Committee of Medical Journal Editors ([www.icmje.org](http://www.icmje.org)) and an ICMJE disclosure of potential conflict of interest form must be
submitted for each author at the time of manuscript submission. A conflict of interest statement must also be included in the manuscript after any ‘Acknowledgements’ and ‘Funding’ sections and should summarise any conflicts of interest included on the ICMJE form. If there is no conflict of interest, authors must include a statement ‘Conflict of Interest: none declared’. These Conflict of interest statements must be included in the manuscript text.

PLEASE NOTE: This is an integral part of the online submission process. If the corresponding author is unable to confirm this information on behalf of all co-authors, the authors in question will be required to complete individual conflict of interest forms. It is the corresponding author’s responsibility to ensure that all authors adhere to this policy.

Language editing
If English is not your first language, before submitting your manuscript you may need to have it edited for language. This is by no means a mandatory step, but may help to ensure that the academic content of your paper is more fully understood by journal editors and reviewers. We will not accept manuscripts with a poor standard of English; your article will be rejected without review. If authors wish to have their manuscript edited before submission, they are liable for all the costs associated with such services. If you need assistance with editing please contact the journal editor.

References
Authors are fully responsible for the accuracy and completeness of their references.

- Reference citations in the text should be identified by numbers in square brackets, in order of citation. For example: This effect has been widely studied [1-3,7]. Do not use footnotes or endnotes as a substitute for a reference list.
- Personal communications and unpublished work should only be mentioned in the text. All references should be listed at the end of the article in Vancouver style.
- The entries in the list should be numbered consecutively.
- When there are more than six authors, give three names + et al.
- The initials should be merged and presented without full stops. So: MJ.
- Use the official abbreviation of the journal followed by a full stop. So: Neth Heart J.
- The year is placed after the journal name.
- There should be no spaces in between the year, volume number and page numbers. Do not use month of publication.
- Indicate the page range. So: 389-95.
- Do not use bold or italics in references.

Examples of a journal reference:

Tables
All tables should be laid out in Word, using the table function. Other tables (e.g. in pdf format or PowerPoint) will not be accepted. Tables should always be cited in the text in consecutive numerical order.

- Do not use internal horizontal or vertical lines.
- Do not use spaces, tabs or hard returns in tables.
- Use the numbering 1, 2, 3. Not 1a, 1b, 1c etc.
- Each piece of data must be contained in its own cell.
• Numbers and percentages are presented in the same cell.
• For each table, please supply a table title explaining the components of the table.
• Footnotes to tables should be indicated by superscript.
• Tables should be only submitted in portrait format. They should not exceed the printed area of the page (174x234 mm).
• Tables containing additional background data, which would be of interest to the reader but cannot be included in the journal for practical reasons, may be submitted as an Electronic Supplementary Material. Publication is at the discretion of the Editor.

Illustrations
Authors are responsible for obtaining permission to publish any figures or illustrations that are protected by copyright, including figures published elsewhere and pictures taken by professional photographers. The journal cannot publish images downloaded from the internet without appropriate permission.

For the best quality final product, it is essential that you submit all your illustrations in an electronic format. The published work will directly reflect the quality of the illustrations provided. All electronic supplementary material will be published as received from the author without any conversion, editing or reformatting!

Please be aware that the figures of your submission will be printed exactly as you see them on your screen. Be sure there are no spelling mistakes as these cannot be corrected in TIFF or JPEG formats.

Use high quality figures, so they can be printed in a normal format. Name your figure files with ‘Fig’ and the figure number, e.g. Fig1.jpg. Please remove all the patient information.

Photographs should be saved in JPEG or TIFF format at a resolution of at least 300 pixels per inch. We do not accept photographs in Word and PowerPoint. The journal does not charge for colour photographs. We prefer that ECGs will be submitted in black/white.

Flowcharts must be submitted in Word (otherwise no textual changes can be made). Please do not use colours in flowcharts. If you need any help with flowcharts, go to: http://www.makeuseof.com/tag/create-stunning-flowcharts-microsoft-word/

Figures, line art and bar graphics must be submitted in Word using the Chart function in black and white. Avoid use of shading and background colour. Each figure must be submitted in a separate file.

Figure lettering
• To add lettering it is best to use Helvetica or Arial (sans serif fonts).
• Keep lettering consistently sized throughout your final-sized artwork, usually about 2-3 mm, 8 pt. Variance of type size within an illustration should be minimal!
• Do not use shading.
• Do not include titles within your illustrations, only A, B, etc.

Figure titles and captions
• Each figure should have a concise title describing accurately what the figure depicts. Include the title in the text file of the manuscript, not in the figure file.
• Figure titles begin with the term Fig. in bold type, followed by the figure number, also in bold type.
• No punctuation is to be included after the number, nor is any punctuation to be placed at the end of the title.
• Identify all elements found in the figure in the figure title; use boxes, circles, etc. as coordinate points in graphs.
• Captions should not exceed 100 words.

Figure placement and size
Figures should be prepared to fit one column (84 mm width) or the whole page (174 mm width).

PLEASE NOTE: Papers submitted to the journal which do not adhere to the instructions for authors will be returned for appropriate revision to be in line with the requirements, and may then be re-submitted.

Copyright information
When manuscripts are submitted for publication, the author will be asked to return a signed letter stating that all authors have seen and approved the paper and that it has not been published elsewhere. If illustrations/figures are to be duplicated from previously published work, the author is responsible for obtaining written permission from the publisher. The letter containing the permission should be submitted with the manuscript.

Review of manuscripts
All manuscripts correctly submitted to the Netherlands Heart Journal will first be reviewed by the Associate Editors. Some manuscripts will be returned to authors at this stage if the paper is deemed inappropriate for publication in the Netherlands Heart Journal, if the paper does not meet submission requirements, or if the paper is not deemed to have a sufficiently high priority. All papers considered suitable by the Editors to progress further in the review process will undergo appropriate peer review and all papers provisionally accepted for publication will undergo a detailed statistical review.

Additional information upon acceptance
Electronic proofs
e.Proofs will be sent to the corresponding author as soon as he/she has filled in the Order Information Form, which will be sent by the publisher (spr-12471@le-tex.de). The corresponding author has in principle 48 hours (2 working days) to correct the e.proofs and to respond to the Queries put forward by the publisher. The page proof is the near-final version of the text for checking purposes only. As it is very expensive to make changes at this stage, we will only accept corrections that are truly essential. We will amend errors in word division, in figures and any errors resulting from the layout process. However, we will not accept corrections regarding, for example, matters of style. After having returned the corrections, the article will appear on PubMed as Epub ahead of Print, and also as ‘Online First’ on Springer Link (springeralerts@springeronline.com). The definite publication in the journal will take place depending on the available space in the forthcoming issues. The corresponding author will be timely informed by the publisher about the appearance of the publication. Once online, it is no longer possible to make changes to an article.

Offprints and reprints
As there is free electronic access to the Netherlands Heart Journal there will be no reprints available of articles published in the journal.

Would you like to receive a New Issue Alert?
To receive a notification as soon as a new issue of the Netherlands Heart Journal is published online, you can sign up for the New Issue Alert. Please follow this link and submit your email address below ‘Alerts for this journal’ on the right side of the page:
http://www.springer.com/medicine/journal/12471

Sharing your article
The Netherlands Heart Journal supports sharing your paper on social media. The journal is open access and all articles can be downloaded from: https://link.springer.com/journal/12471. Share a link to your article on social media, in your LinkedIn profile, and include it on your or your institution’s
webpage. Do not forget to mention the DOI link. Contact us if you think your article is interesting for a wider audience. The NVVC may consider referring to it in their newsletter.

**Additional information**

**Contacting the Editorial Office**

In case additional information or assistance is needed with the submission and/or review process, please contact the JEO Assistant Mr. Sarvagnan Subramanian, email: sarvagnan.subramanina@springernature.com, T +91 44 42197752.

For any other questions: Contact the journal editor of the office: Lieda Meester, tel. 030-638 38 56, email: l.meester@bsl.nl
