Special Issue on Dynamic Games in Economics and Management Science

In memory of Engelbert J. Dockner (1958 – 2017)

Guest Editors

Steffen Jorgensen, University of Southern Denmark (steffenjorgensen2510@gmail.com)

Ngo Van Long, McGill University (ngo.long@mcgill.ca)

Gerhard Sorger, University of Vienna (Gerhard.sorger@univie.ac.at)

In 2018, Dynamic Games and Applications will publish a special issue on dynamic games in economics and management science, in memory of Engelbert Dockner who made path-breaking contributions to dynamic game theory and its application in economics and management science.

The special issue welcomes submissions from theoreticians as well as applied researchers.

Applications could include topics that Engelbert Dockner has worked on, such as advertising games, capital accumulation games, dynamic games in environmental economics, fishery economics, industrial organization, and finance, but are not restricted to these topics.

Authors are encouraged to relate their submissions to the published work of Engelbert Dockner.

Earlier submission is encouraged, and papers will appear online following acceptance in advance of the production of the full special issue.

Submission Deadline: October 31, 2017
Publication Date: Late 2018.
