Guidelines for Authors of the *Journal of Mining Science*

*Copyright Information*
When submitting a manuscript, the authors guarantee that the work has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); the work is not considered for publication elsewhere; its publication has been approved by all co-authors, if any, as well as (tacitly or explicitly) by the responsible authorities at the institution where the work has been carried out. Together with the manuscript, the authors should submit completed, signed, and scanned copy of the Copyright transfer agreement.

*Manuscript Preparation*
The *Journal of Mining Science* reflects the current trends of development in fundamental and applied mining sciences. It publishes original articles on geomechanics and geoinformation science, investigation of relationships between global geodynamic processes and man-induced disasters, physical and mathematical modeling of rheological and wave processes in multiphase structural geological media, rock failure, analysis and synthesis of mechanisms, automatic machines, and robots, science of mining machines, creation of resource-saving and ecologically safe technologies of mineral mining, mine aerology and mine thermal physics, coal seam degassing, mechanisms for origination of spontaneous fires and methods for their extinction, mineral dressing, and subsoil management.

Please submit your documents (manuscript, files with graphic, copyright transfer agreement) electronically to the Editorial Board of the *Journal of Mining Science*. Manuscripts can be submitted in the Russian or English language. The Editorial Board of the journal requests authors to take particular care to ensure that manuscripts are structured according to the style of the journal.

For papers written by non-English speaking authors, it is strongly recommended to request proofreading by a native English speaker.

**Manuscripts that fail to comply with these guidelines may not be accepted for consideration.**

*Manuscript Structure and Format*
The manuscript should contain:
– a manuscript *title* as concise and informative as possible;
– *authors’ names and surnames*, the information about the corresponding author (name, surname, e-mail address, and telephone number) should be indicated;
– unabbreviated *affiliations and addresses* (zip code, city, country) of the authors;
– an *abstract* of 100 to 150 words;
– 4 to 6 *keywords* which can be used for indexing purposes;
– *main text* with *tables and figures* inserted in the body of text as closest as possible to their mentioning;
– *references.*
Main Text

The size of the manuscript should not exceed 16 pages of typewritten text including tables, figures, formulas, etc. Sheet format is A4. Margins are 2 cm top, bottom, and right; left margin is 2.25 cm. The manuscript should be presented in the Microsoft Word format. Font is Times New Roman, font size is 12. Interline space is minimum 12, indent of the first line of a paragraph is 0.5 cm. Decimal fractions are written using points (for example, 0.98). The text body is justified. All headings are centered and numbered, excluding Introduction, Conclusion and References.

Mathematical formulas. Ordinal numbers are given only to the most important formulas to which the references are made in the text; the numbers are placed in round brackets at the right margin of the page. A consecutive numeration or numeration by sections, if any in the paper, is used (for example, (5), (2.6), (3.11-3.15)). Interpretation of formula symbols is given in the sequence they were used in the formula. Please use the simplest indices; number of letters in them must be minimum. All numbered formulas are centered. The preferred editor for mathematical equations is Math Type with the following sizes: usual – 12, big index – 8, small index – 6, big symbol – 24, small symbol – 12.

Measurement units. When preparing the manuscript, it is necessary to follow the International System of Units (SI). Notations of units are set in Roman (Pa, W/m², J/(kg·K), etc.). Units of measurements are separated with comma.

Figures. Each figure should have a caption with 9.5 pt font size. Figures are numbered consecutively in the order they appear in the text. Please insert your figures and tables in the body of text as closest as possible to their mentioning. In addition, each figure should be sent as a separate file. Figures should be clear and high-resolution. Advisable sizes of figures are 60x150, 60x70 mm. Instead of explications the figure or letter notations should be used in the illustrations, which must be explained in the caption or in the text.

Vector drawings should be submitted in the format of the software in which they were created (CorelDraw, Adobe Illustrator etc.) or in the encapsulated postscript (EPS) format. Microsoft Office files are also acceptable.

For photographs and paintings for fine shading use TIFF, JPG or BMP format with a minimum resolution of 600 dpi.

Please pay special attention to color art and avoid it whenever possible. Using color art is permissible for online publication, but it will be automatically converted to black and white during production of the print version of the journal. Make sure that the main information will still be visible. Many colors are not distinguishable from one another when converted to black and white. A simple way to check this is to make a xerographic copy to see if the necessary distinctions between the different colors are still apparent. Please do not refer to color in the captions. More information about color illustration can be found at http://pleiades.online/en/authors/guidlines/prepare-electonic-version/images/

Tables. Font size is 10 pt. Tables are centered. All tables are numbered. A caption is required when the table is of independent significance; tables of auxiliary character are given without caption. Omissions in columns (when there are no data) should not be blank; they are filled in using dash.

Acknowledgments

This is an optional section to acknowledge any help or assistance, or participation in handling the work or preparing the article: (a) general information on useful discussions, thanks to colleagues and reviewers; (b) sharing information, data, computation and instrumentation; (c) experimentation in shared use centers; (d) text revision and makeup; as well as all other such thing considered as help but not sufficient contribution to the authorship.

Funding
This section is to inform on granting and any other financial support of research. Please avoid using names of institutions and sponsors in abbreviated form in this section.

**Conflict of Interest**

This is a mandatory section. A conflict of interest is any relationships or spheres of interest that may directly or indirectly influence or bias the work. If there is no conflict of interest the authors should state that:

The authors declare that they have no conflict of interest.

**References** are compiled in the course of their citation in the text and given at the end of manuscript. Unpublished materials should not be included. Citations in the text are given in square brackets: [1], [2,3], [4–7]. Most abbreviations for journals can be found at [http://cassi.cas.org/search.jsp](http://cassi.cas.org/search.jsp)
