Health and Technology

CALL FOR PAPERS

Special issue on

CNIB 2018: Technologies for improving Health

http://www.springer.com/engineering/biomedical+engineering/journal/12553

Technologies to improve health have been developed in many ways, for example, from the creation of X-ray machines to a robot to perform high-precision surgeries; invention of instruments to support patients to have a better quality of life; as well as the treatment of data (signals and / or images) obtained from patients and predict any disease or support to make a better diagnosis, among many others. With that in mind, the aim of this special issue is to solicit original contributions in the following non-exclusive themes that are aligned with National Conference on Biomedical Engineering, CNIB 2018 conference:

- Medical signal and images processing
- Bioinstrumentation, biosensors, and micro/nano technologies
- Biomaterials and tissue engineering
- Biomechanics, rehabilitation, and prothesis
- Medical physics
- Modelling and simulation on biological and physiological systems
- Innovation and development of health technologies
- Clinic engineering and normativity

Health and Technology is jointly published by Springer and the IUPESM (International Union for Physical and Engineering Sciences in Medicine) in cooperation with the World Health Organization.

Authors attended the 41st National Conference on Biomedical Engineering, CNIB 2018, http://somib.org.mx/cnib/ are invited to submit papers expanding their work presented at the conference. In addition, authors not attending CNIB 2018 are also invited to submit their work if it falls within the topic of the special issue. Only original and well-focused papers presenting previously unpublished work will be considered.

GUEST EDITORS:

Dora-Luz Flores, PhD
Professor at Autonomous University of Baja California, Mexico
Secretary at Mexican Society of Biomedical Engineering
dflores@uabc.edu.mx, secretariado@somib.org.mx

Nelly Gordillo-Castillo, PhD
Professor at Autonomous University of Juarez, México
Editor-in-chief of Mexican Journal of Biomedical Engineering
nelly.gordillo@uajc.mx, rmib.somib@gmail.com

SUBMISSION OF MANUSCRIPTS

Manuscripts must be prepared according to the format of Health and Technology journal (http://www.springer.com/engineering/biomedical+engineering/journal/12553?detailsPage=pltc_h_1325108) and electronically submitted at the journal website: https://www.editorialmanager.com/heal/default.aspx. The authors who selected from CNIB 2018 will have to choose the special issue title.

DEADLINE FOR SUBMISSION: January 15th, 2019

FINAL DECISION: June 15th, 2019

PUBLICATION: September, 2019

For any further questions, please contact the Guest Editors or the Editor-in-Chief:

Prof. Luis Kun (Distinguished Professor Emeritus, William J Perry Center for Hemispheric Defense Studies, Washington, USA, email: hcii@aol.com)
