## Journal Metrics 2017

### Speed

|   |    |
|---|----|
| <p><b>Days from submission to first decision - 2017</b><br/>           Number of days from submission of the manuscript to first decision.</p>  | 7  |
| <p><b>Days from acceptance to online publication - 2017</b><br/>           Number of days from acceptance at publisher to published online.</p> | 43 |

### Usage

|  |        |
|--|--------|
| <p><b>Downloads - 2017</b><br/>           Springer measures the usage on the SpringerLink platform according to the COUNTER (Counting Online Usage of NeTworked Electronic Resources) standards.</p>   | 11,505 |
| <p><b>Usage Factor - 2016/2017</b><br/>           The Springer Journal Usage Factor 2016/17 was calculated as suggested by the COUNTER Code of Practice for Usage Factors. It is the median value of the number of downloads in 2016/17 for all articles published online in that particular journal during the same time period. The Usage Factor calculation is based on COUNTER-compliant usage data on the SpringerLink platform. (Counting Online Usage of NeTworked Electronic Resources) standards.</p> | 187    |

## Impact

|   |       |
|---|-------|
| <b>CiteScore 2017</b><br>CiteScore 2017 counts the citations received in 2017 to documents published in 2014, 2015 or 2016, and divides this by the number of documents published in 2014, 2015 and 2016.   | 1.30  |
| <b>SNIP - 2017</b><br>Source Normalized Impact per Paper (SNIP) measures contextual citation impact by weighting citations based on the total number of citations in a subject field. The impact of a single citation is given higher value in subject areas where citations are less likely, and vice versa. | 1.064 |
| <b>SJR - 2017</b><br>SCImago Journal Rank (SJR) is a measure of scientific influence of scholarly journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations come from.  | 0.280 |
