## Journal Metrics 2017

### Speed

<table>
<thead>
<tr>
<th>Days from acceptance to online publication - 2017</th>
<th>19</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of days from acceptance at publisher to published online.</td>
<td></td>
</tr>
</tbody>
</table>

### Usage

<table>
<thead>
<tr>
<th>Downloads - 2017</th>
<th>78,912</th>
</tr>
</thead>
<tbody>
<tr>
<td>Springer measures the usage on the SpringerLink platform according to the COUNTER (Counting Online Usage of NeTworked Electronic Resources) standards.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Usage Factor - 2016/2017</th>
<th>217</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Springer Journal Usage Factor 2016/17 was calculated as suggested by the COUNTER Code of Practice for Usage Factors. It is the median value of the number of downloads in 2016/17 for all articles published online in that particular journal during the same time period. The Usage Factor calculation is based on COUNTER-compliant usage data on the SpringerLink platform. (Counting Online Usage of NeTworked Electronic Resources) standards.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>LinkOut Statistics - 2017</th>
<th>13,601</th>
</tr>
</thead>
<tbody>
<tr>
<td>One of the most important indexing services for biomedical and life sciences literature, PubMed, provides us with information on how often PubMed users follow links to SpringerLink.</td>
<td></td>
</tr>
</tbody>
</table>
### Impact

<table>
<thead>
<tr>
<th>Metric</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Impact Factor - 2017</strong></td>
<td>2.382</td>
</tr>
<tr>
<td>Journal Impact Factors are published each summer by Thomson Reuters via Journal Citation Reports®. Impact Factors and ranking data are presented for the preceding calendar year.</td>
<td></td>
</tr>
<tr>
<td><strong>SNIP - 2017</strong></td>
<td>0.841</td>
</tr>
<tr>
<td>Source Normalized Impact per Paper (SNIP) measures contextual citation impact by weighting citations based on the total number of citations in a subject field. The impact of a single citation is given higher value in subject areas where citations are less likely, and vice versa.</td>
<td></td>
</tr>
<tr>
<td><strong>SJR - 2017</strong></td>
<td>0.710</td>
</tr>
<tr>
<td>SCImago Journal Rank (SJR) is a measure of scientific influence of scholarly journals that accounts for both the number of citations received by a journal and the importance or prestige of the journals where such citations come from.</td>
<td></td>
</tr>
<tr>
<td><strong>h5 Index - 2017</strong></td>
<td>23</td>
</tr>
<tr>
<td>Google's h5 Index is a metric based on the articles published by a journal over the previous 5 calendar years with a minimum of 100 articles in this period. If a journal publishes 100 articles sooner, an h5 Index can be calculated earlier. h is the largest number of articles that have each been cited h times. The h5 Index therefore cannot be dominated by one or several highly cited articles.</td>
<td></td>
</tr>
<tr>
<td><strong>Journal Author Satisfaction - Overall Satisfaction</strong></td>
<td>100%</td>
</tr>
<tr>
<td>The percentage of responding authors who rated their publishing experience with the journal as 'excellent' or 'good'.</td>
<td></td>
</tr>
</tbody>
</table>
