Journal Metrics 2017

Usage

**Downloads - 2017**

Springer measures the usage on the SpringerLink platform according to the COUNTER (Counting Online Usage of Networked Electronic Resources) standards.

**Usage Factor - 2016/2017**

The Springer Journal Usage Factor 2016/17 was calculated as suggested by the COUNTER Code of Practice for Usage Factors. It is the median value of the number of downloads in 2016/17 for all articles published online in that particular journal during the same time period. The Usage Factor calculation is based on COUNTER-compliant usage data on the SpringerLink platform. (Counting Online Usage of Networked Electronic Resources) standards.

Impact

**h5 Index - 2017**

Google's h5 Index is a metric based on the articles published by a journal over the previous 5 calendar years with a minimum of 100 articles in this period. If a journal publishes 100 articles sooner, an h5 Index can be calculated earlier. h is the largest number of articles that have each been cited h times. The h5 Index therefore cannot be dominated by one or several highly cited articles.
