

CALL FOR PAPERS

Energy, Ecology and Environment

Special Issue on
Energy, Sustainability and Climate Change

Dr. Georgios K.D. Saharidis, guest editor, University of Thessaly, Greece.

Energy, Sustainability and Climate change have been successfully studied in the framework of a variety of applications involving energy, transportation, the environment. Although there have been successful efforts in both theoretical and applied results, there is still a number of outstanding questions regarding: Wind Power Plant, Climate change mitigation, Natural gas hub, Life Cycle Assessment, Seasonal solar thermal energy, National emission trading system, Co-modal emission calculation, Electricity transmission, Electricity market forecasting, Clean coal technologies, Waste heat recovery, Photovoltaic effect, Decoupling CO₂ emissions etc.

In this Special Issue, we invite contributions in both theoretical developments and applications of Energy, Sustainability and Climate Change.

Topics suitable for this Special Issue include, but are not limited to, the following:

- Decision Making in Energy, Ecology and Environment
- Competition in Electricity Markets
- Electricity Risk Management
- Emissions: GHG or Non-GHG
- Energy & Environment
- Energy & Ecology
- Energy Efficiency
- Energy Systems
- Fuels, Biofuels
- Hydroelectricity, Geothermal & Solar Energy
- Maritime and Air Transportation
- Natural Resources
- Operational Research and Energy, Sustainability & Climate Change
- Power Generation and Trading
- Process Optimization, Synthesis, Design and Operation
- Renewable Energy
- Sustainability in Supply Chain
- Sustainable Energy
- Transportation and Energy Efficiency
- Vulnerability, Sustainability & Stochasticity
- Sustainability in Transportation.

Opening date: 01/08/2018

Deadline for submissions: Mai 31th, 2020

Submission procedure:

To submit your manuscript for consideration to the Energy, Ecology and Environment Special Issue on Energy, Sustainability and Climate change, please click on the URL: <http://www.springer.com/energy/journal/40974> and follow the instructions.

When submitting your manuscript to the Special Issue, first click "Submit new manuscript", and select the article type "S.I. : ESCC 2018". Instructions for authors can be found at <http://www.springer.com/energy/journal/40974#>.

This special issue is organized in the frame of LIFE GreenYourMove project with the contribution of the LIFE programme of the European Union - LIFE14 ENV/GR/000611 (GreenYourMove- GYM). GreenYourMove is a European Research Project co-funded by LIFE, the EU financial instrument for the environment. GreenYourMove's main objective is the development and promotion of a co-modal journey application to minimize GHG emission and energy consumption in European transportation. GreenYourMove develops a multi-modal transport planner (both routing & ticketing system) considering all kinds of urban public transportation (urban and sub-urban buses, metro, tram, trolley, trains), where the user gets alternative routes combining more than one transport modes if necessary. The routes are the most energy saving and environmentally friendliest ones, since emissions and energy consumption are calculated for different scenarios.
