

GUIDELINES FOR AUTHORS

We accept manuscripts typed on a computer or typewriter. The authors should follow the instructions listed below.

1. The maximum size of an article is 16 journal pages, and that of a brief communication is 4 journal pages. Longer articles may be accepted only by an ad hoc decision of Editorial Board.

2. Manuscripts prepared on a computer must be accompanied by files, which should be sent by email to faa@mi-ras.ru. This is necessary for promptly organizing the refereeing process.

We also ask the authors to make sure that all further changes of a manuscript prepared on a computer be accompanied by renewed versions of files.

3. The preferred typesetting system for manuscripts prepared on a computer is TeX (the final camera-ready version of the journal is typeset with LaTeX2e). The number of nonstandard macros in the TeX file of your manuscript should be minimized.

The use of macros for coding text insertions is not allowed.

4. The manuscript must be submitted via email in the form of a PDF file with the mandatory attachment of the original TeX or Word files, including graphic files.

5. The authors are recommended to prepare digital images with the aid of graphics software supporting scalable (vector) formats (cdr, drw, cgm, eps, ps), such as `\textit{CorelDraw}`, `\textit{AutoCad}`, `\textit{Adobe Illustrator}`, etc. Bitmap (raster) formats (bmp, pcx, tiff, jpg, etc.) should not be used.

6. By agreement with the editorial team, authors residing in distant foreign countries may be allowed to submit a PDF scan of a hand-written manuscript in Russian and/or a text file containing the English version of the same manuscript.

7. All manuscripts must contain an abstract (10 lines or less) and a list of at most 10 keywords in Russian and English.

8. The authors must provide the following personal data: first name, patronymic, surname, home mailing address, home and mobile phone numbers, email address, and Skype address and/or WhatsApp number for rapid communication.

9. A set of page proofs (as a PDF file) will be sent to the corresponding author by

email.

The author should return the checked and corrected proofs as soon as possible.

10. The authors of manuscripts accepted for publication are encouraged to present an English translation of the manuscript not later than one month after the acceptance date (the authors should inform the editorial team about their willingness to make translation when submitting the manuscript).

The translation must strictly follow the Russian original. In case the author's translation deviates (including in formulas) from the Russian original, the editors bring it into conformity with the original. Translations of enough linguistic and scientific quality are paid for. A set of proofs of the translation is also sent to the author for checking corrections made by an editor.

Email addresses for corresponding with the editorial team: faa@mi-ras.ru (Galina Mikhailovna Tsukerman), boris.amosov@gmail.com (Boris Avenirovich Amosov).
